

What is claimed is:

1. A reclosable package comprising a zipper closure and a slider device, said packaging formed by:
 - (a) providing a closure construction having a first closure profile and a second closure profile, the closure construction having a length approximately equal to the package width;
 - (b) providing a slider device constructed and arranged for mounting on the closure construction and for interlocking the first closure profile with the second closure profile when the slider device is moved in a first direction, and for disengaging the first closure profile from the second closure profile when the slider device is moved in a second opposite direction;
 - (c) mounting the slider device onto the closure construction;
 - (d) attaching the closure construction with the slider device mounted thereon to a first half of a film web;
 - (e) attaching the closure construction with the slider device mounted thereon to a second half of the film web;
 - (f) forming a first side edge, a bottom edge, and a top edge;
 - (g) filling the resealable package with an item; and
 - (h) forming a second side edge.

2. The reclosable package according to claim 1, the package comprising:
 - (a) first and second side panel sections, the first and second side panel sections having first and second side edges and a bottom edge, the side edges and bottom edge defining an interior; and
 - (b) a zipper closure construction having a slider device mounted thereon sealed to the first and second side panel sections along a top edge of the side panel sections.
3. The reclosable package according to claim 2, further comprising a tamper-evident structure extending from the first and second side panel sections and disposed over the slider device.
